THE HORSESHOE BRAND

The Horseshoe Brand on Boots, Shoes and Harness shows that they are the best quality. Goods marked with this brand cannot be bought from mail order houses or firms that buy only the cheap grades of Harness and boots, that look better than they really are. The Horseshoe Brand goods are guaranteed and the others are not. When buying Boots, Shoes or Harness see that the Horseshoe is stamped on them.

HESKETH WOMEN'S INSTITUTE DONATES PRIZES

On Tuesday afternoon, June 22, the Hesketh school was the scene of an All Canadian Program on the occasion of the presenting of prizes to the winners for the best essays on Canadian Authors, which were donated by the Hesketh Women's Institute. Mrs. Dr. Gibson of Drumheller, Convenor for the Hand Hills Constituency, and Mrs. Moir, President of the Drumheller Institute, judged and distributed the prizes, which went to Louise Pratt, first, and Mary Rowbottom, second. Both winners chose Pauline Johnson as the author.

After the program and judging, the Institute served tea and ice cream to the children.

LITTLE ITEMS OF LOCAL INTEREST

J. H. Oliphant has been appointed to the Board of Examiners for mine certificates and will have charge of the Carbon district.

Mrs. Livingstone and Mr. Notley, of Olds, and Miss K. Watson, of Calgary, were visitors at the home of Mr. and Mrs. English over the week end.

Mrs. Gordon and daughter, Lita

Swalwell

A twenty-four hour service by the government telephones is to be inaugurated on and after July 1st.

Mrs. Odey, sister of Mrs. Dougherty, who is from Seattle spent a few days here on a visit during the week.

Mr. and Mrs. Dango, parents of Mrs. Page, are taking up their abode in Swalwell and are temporarily living above the store.

The local Livestock Pool shipped a car of hogs on Tuesday; the next shipment will be two weeks hence.

Great strides are being made with the building of the new Pool elevator. Three weeks more will probably see it completed.

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that The Council of The Village of Swalwell has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, Viz.

The untraveled road allowance forming part of the northern limits of the north half of Section 9 Township 30 Range 24 west of the 4th Meridian.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton within thirty days from the date of this notice.

Dated at Swalwell this 21st day of June.

HARRY R. LONGSTAFF,
Secretary Village of Swalwell.

spent a few days visiting with friends in Stavely.

Mrs. L. Hay was taken to the Holy Cross Hospital, Calgary, on Friday and was successfully operated on for appendicitis on Friday evening.

Mrs. Torrance and Mrs. McFarlane accompanied Mrs. Hay to

Is the Pool Not Worthy of Your Support?

No matter what anyone says to the contrary, the Wheat Pool has exerted an upward tendency on prices both in and out of Canada. The Pool has meant fairer dealing to the farmers and a more satisfied and contented countryside. It has meant "better living" for Alberta farmers.

Are these not worthy objects? Has not the achievement of Wheat Pool been a notable one? Is it not worthy of your active and loyal support?

Canada's Diamond Jubilee

Only once in the history of any nation does the opportunity come to its people to celebrate the diamond jubilee of its founding. Canadians will enjoy that opportunity on July 1st next, and it is gratifying to note that the celebration will be well nigh universal from coast to coast. Canadians, no doubt, would have with equal zest and enthusiasm celebrated the fiftieth anniversary of Confederation but for the fact that in 1917 they were engaged in a life and death struggle in which the very existence of Canada was at stake. The victory won through the great sacrifices then made should add to the gratitude and pride of our people in this year of the Diamond Jubilee.

Children today may have the opportunity of celebrating one hundred years of Confederation, but our adult population will not, and so those who actually witnessed the inauguration of this young nation, and those who have taken part in its earlier development, will no doubt throw themselves whole-heartedly into the ceremonies which will commemorate this historic event.

It is the repeatedly expressed desire of the National Committee created by Parliament to promote this Diamond Jubilee celebration that it should be participated in by all the people, old and young, in small hamlets and rural districts as well as in the larger centres of population. It is the spirit of the ceremonies rather than in their elaborate character that their real significance and value will be found.

The National Committee has, therefore, urged that there be at least one simple little ceremony everywhere at the same hour, and have suggested that, at twelve o'clock noon on July 1st in every community however small, bells should be rung, whistles blown, and the two national anthems "God Save the King" and "O Canada" sung. And again, that at 2:30 o'clock on the afternoon of Sunday, July 3rd, a community service of general Thanksgiving be held. For this latter service the National Committee is preparing a simple programme of exercises suitable for all communities.

These are suggestions which can readily be carried out in all communities, and it is to be hoped that the people of the Dominion will accept the lead of their National Committee and unitedly co-operate with it in giving effect to these suggestions. They need in no way interfere with the larger and more elaborate programmes being arranged in most cities, towns and villages.

It is further suggested that a tree be planted in every community with fitting ceremonies to be hereafter cared for and known as the Diamond Jubilee Confederation Tree. This, too, offers no obstacle on the score of expense to any community. Not only can such a tree be planted in some public place in all urban communities, but there would appear to be no reason why a Confederation Tree should not be given a place of honor in the grounds of every rural school throughout the length and breadth of the Dominion.

As a further marking of Canada's sixtieth birthday anniversary it is proposed that some public park or place in every community be named "Canada Place" or "Canada Square." If all such places already bear names, then one, the designation of which has no special significance, might be named in accordance with this suggestion.

Every child enrolled in a public, separate or private school in Canada in this Jubilee year is to receive a medal struck in the Royal Mint at Ottawa, the gift of the National Committee. The presentation of these medals to the pupils offers a splendid opportunity to school district officials to plan a little ceremony at which a short talk on what Confederation has meant and has achieved for Canada could be given, and the boys and girls of today urged to render loyalty and devotion to Canada and dedicate their lives in service to their country.

Like most people living in northern climes, Canadians are not much given to showing their feelings. Their patriotism is something they do not talk about to any extent and they are seemingly averse to display. But this Diamond Jubilee is one occasion on which the people of Canada may well unbend a little, display their flag with profusion, shout and cheer. It will do them good, and especially should the children be encouraged to regard Dominion Day, 1927, as a red letter day in their young lives, and celebrate it accordingly.

Air Not Yet Conquered

Casualties in Long Flights Greater Than the Successes

Since Lindbergh winged his way through hall and fog and night to Paris, men have begun to talk about flying to Honolulu, to Australia, and to Japan. It is quite possible that, in time, such feats may be accomplished.

Babies Cry For "Castoria"

Prepared Especially for Infants and Children of All Ages

Mother Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The genuine bears signature of

Chas. H. Fletcher.

W. N. U. 1685

ed, but to conclude that they are going to be accomplished as a mere matter of course is to fly into the face of experience. Lindbergh, with extraordinary luck as well as skill, got to Paris. But in the meantime Pinedo fell into the ocean near the Azores. Lieutenants Carr and Gillman, flying from England to India, fell into the Persian Gulf. And Nungesser and Coli, flying across the Atlantic disappeared.

That is a price in casualties which ought at least to qualify some of the easy optimism about over-the-ocean flights.

Origin of "Vaudeville"

Vaudeville originally meant a light, gay song, but it is now used as meaning a light kind of play introducing a number of songs. The word is derived from Vau-de-Vire, the name of two valleys in Normandy, where, in the fifteenth century, a French poet composed songs that became popular and were called Vaux-de-Vire, after the valleys.

Nine days constituted the reign of one English queen. She was Lady Jane Grey, granddaughter of Henry VIII, and was executed on a scaffold in the Tower of London in 1554.

Minard's Liniment for insect bites.

Wins Prize in England

Tobacco From Canadian Farms Awarded Medal for "Outstanding Excellence"

Canadian tobacco has been awarded a silver medal for the "outstanding excellence" of leaf tobacco shown at the International Tobacco exhibition held at Olympia, London, in May, according to an announcement made by the Department of Agriculture.

The Canadian exhibit was prepared by the Tobacco Division of the Central Experimental Farm, Ottawa, in competition with South Africa, Colombia, Italy, Greece and Macedonia. Canadian tobacco exports trebled in 1926 and the value of the leaf sent to Great Britain alone totalled over \$2,000,000.

2 Years' Backache Subdued by "Nerviline"

"Backache was the bane of my life, and for two years I was so lame as to be unfit for work," writes E. S. Sloane, from Georgetown. "While in Smith Bros' Drug Store, I heard of Nerviline being a wonderful pain-destroyer, so I decided to try Nerviline. Thanks to Nerviline, my two years' backache was rubbed away, and today I am perfectly well."

All those who suffer from weak, aching backs, those whose muscles are stiff, whose joints are swollen, let them try Nerviline—the liniment that never fails. 35¢, at all dealers.

Agreement Has Expired

Railway Assisted Many Alberta Farmers to Move From Dry Area

Free movement of farmers and their effects from the drier areas in southeastern Alberta to new locations elsewhere in the province stopped at the end of May when the agreement between the government and the railways expired. During the past season to the end of April a total of 568 families with 985 cars of stock and effects have been removed under this arrangement. The majority of settlers thus changing their locations have gone to the farming country along the foothills from the Lethbridge district to as far north as Grande Prairie.

WOMEN WHO ARE WEAK

Gain New Vitality by Building Up the Blood

There are many women who pass their days in a constant state of weariness. They have barely sufficient energy to enable them to perform their manifold duties. Often they have an aching head, a miserable pain in the back and limbs that feel as heavy as lead. The whole trouble is due to bloodlessness. No woman need suffer in this way. It is easy to obtain a supply of rich red blood by taking Dr. Williams' Pink Pills. The new blood created by these pills rapidly builds up the system; headaches and backaches disappear, energy returns and the joy of living is felt once more.

Proof of these statements is given by Mrs. Ed. Lanoie, Stoney Point, Ont., who says: "For a long time I had been in a very miserable condition, always feeling tired out, sleepy and weak. The least work about the house would leave me helplessly tired and nothing that I did seemed to give relief. Believing that a rest might do me good, we moved to town, but, contrary to expectations, instead of getting better I was growing steadily weaker. One day while talking to a neighbor, she urged my taking Dr. Williams' Pink Pills, telling me that her daughter had been in a condition much like mine. This persuaded me to try this medicine, and I have much reason to be grateful that I followed her advice. After the use of a few boxes of the pills, there could be no doubt that they were helping me, and as I continued their use my health and strength came back and now I am doing all my own work and feeling in the best of health. For this splendid condition I must give thanks to Dr. Williams' Pink Pills."

The pills are sold by all druggists, or you can get them by mail at 50¢ a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A common Italian salutation in the morning is, "God give you a good day."

Cuticura Preparations

Unexcelled in purity, they are regarded by millions as unrivaled in the promotion of skin and hair health. The purifying, antiseptic, pore-cleansing properties of Cuticura Soap invigorate and preserve the skin; the Ointment soothes and heals rashes and irritations. The freely-lathering Shaving Stick causes no irritation, but leaves the skin fresh and smooth. The Talcum is fragrant and refreshing.

Sample Pack Free by Mail. Address Canadian Depot: "Steamhouse," Price, Soap 25c, Ointment 25 and 50c, Talcum 25c. Cuticura Shaving Stick 25c.

Many Prizes For Aviators

More Than \$100,000 Offered for Five Long Air Races

With prizes totalling more than \$100,000 offered for long distance flights over continent and ocean adventurous aviators may now choose from at least five events of the kind during the next few months.

To date, the prize offers and proposed flights are:

\$35,000 offered by James Doyle, of Honolulu, for a non-stop flight from the Pacific Coast to Honolulu — \$25,000 for the first and \$10,000 for the second aviator to make the hop.

\$25,000 offered by William K. Eastwood, Dallas, Texas capitalist, for the first to fly from Dallas to Hong Kong, 10,000 miles.

\$32,000 offered by the business men of Spokane, Wash. for a series of races between New York and Spokane. This race is sponsored by the National Aeronautic Association.

\$50,000 by Sid Grauman, Hollywood, Calif., for the first to fly from Los Angeles to Tokio, 5,000 miles.

\$2,500 by Spokane interests for a race from San Francisco to Spokane.

A Country of Centenarians

Spain Has Large Number of Persons Over Hundred Years Old

Spain is the land of centenarians. The latest official census states that 354 persons (ninety-six men and 258 women) have reached the age 100; seventy-five men and 201 women are more than 100 years old, and a number have reached 110 years.

There are 22,150 men and 36,294 women more than eighty years old.

It will be seen that women are longer lived than men. Even Madrid, which has the reputation of being unhealthy, has twenty-four women and eleven men who are more than 100 years old.

Miller's Worm Powders are complete in themselves. They not only drive worms from the system, but repair the damage that worms cause and so invigorate the constitution that it speedily recovers from the disorders of the digestion that are the result of the work of these parasitic intruders. They do their work thoroughly and strength and soundness follow their use.

New Coins For Free State

Design Proposed Tells Modern Ireland Story in Sequence

Almost the entire barnyard is represented in the obverses proposed for the new coins for the Irish Free State. The battle over designs for the new coinage has been won by the protagonists of emblems illustrating Erin's prestige as a horse-breeding and agricultural country.

The designs submitted include the horse, the bull, the fish and other Irish products, a series of eight designs, telling modern Ireland's story in sequence. It is highly probable that the reverse will display the harp, the national emblem. The issue is expected before Christmas.

No Rest With Asthma. Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Too Undignified for City

Mexico's beast of burden, the burro, has been barred from the streets of Mexico City. The patient, picturesque little animals, which for centuries have packed cargoes of country produce to the metropolis, now interfere with motor traffic, and, according to an official order just issued, give an "undignified aspect to a civilized city."

For Sprains and Bruises. — There is nothing better for sprains and contusions than Dr. Thomas' Electric Oil. It will reduce the swelling that follows a sprain will cool the inflamed flesh and draw the pain. It will take the ache out of a bruise by counteracting the inflammation. A trial will convince any who doubt its power.

The annual loss of timber at present suffered by Canada's forests through the agencies of fire, insects, and disease is greater than the amount annually used for all industrial purposes.

UNIVERSITY OF MANITOBA WINNIPEG

Offers, among others, the following Courses:

Through its FACULTY OF ARTS AND SCIENCE courses leading to the degrees of B.A. and M.A.; and B.Sc., including B.Sc. (Phys.), and B.Sc.

Through its FACULTY OF ENGINEERING AND ARCHITECTURE courses leading to the degrees of B.Sc. (C.E.), B.Sc. (M.E.), M.Sc., and Ph.D.

Through its FACULTY OF MEDICINE courses leading to the degrees of M.D. and C.M.

Through its FACULTY OF AGRICULTURE AND HOME ECONOMICS courses leading to the degrees of B.S.A. and B.Sc. (H.E.)

Through MANITOBA LAW SCHOOL, an affiliated institution, a course leading to the degree of LL.B.

For terms of admission, details of courses and other information apply to

W. J. SPENCE, Registrar,
University of Manitoba, Winnipeg

Air Mail Problem

The experimental work in connection with the post office department's air mail programme will likely be delayed until the early fall, according to latest advices.

It has been decided not to call for tenders for any definite airmail routes at the present time.

But late this summer the Royal Canadian Air Force will undertake some experimental work in the Gulf of St. Lawrence and will carry on into the winter months.

The intention is to secure accurate information respecting flying conditions before any contracts are entered into with private concerns.

We might enjoy work more if we did not have to do it.

A Bank half a century older than the Dominion itself—equipped through experience, resources, organization, and connections to serve helpfully all Canadian business

BANK OF MONTREAL

Established 1817

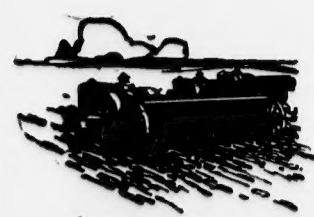

Total Assets in excess of \$ 750,000,000

Raise Larger Crops and Make More Money

Plow 5 to 8 acres daily

Double disc 15 to 25 acres daily

Seed 35 to 40 acres daily

In crop production the Fordson farmer's advantages are sevenfold:

First — He prepares an ideal seed bed. Fordson speed and power allow thorough use of plow, disc, cultivator and harrow producing a splendid state of tilth in which young plants thrive heartily.

Second — He prepares as much land for field crops as he had planned.

Third — He gets his seeding done on time.

Fourth — He accomplishes the work with greater ease and convenience.

Fifth — He receives a larger yield from timely work well done.

Sixth — His cost is much lower because one man can do two or three times as much work.

Seventh — He makes more money.

In addition the Fordson farmer has ample power for such belt jobs as threshing, filling silos, baling hay, grinding grain, sawing wood, and many others.

Over 17,000 Fordson farmers in Canada enjoy these advantages.

WORLD HAPPENINGS BRIEFLY TOLD

Slavery has almost ceased in Burma, the Governor has notified the Viceroy of India.

The United States legation will establish offices in the Metropolitan Building in the heart of Ottawa.

Captain Montague White-Fraser, 73, veteran of the South African War, and former member of the R.N.W.M.P., is dead at Vancouver.

Finally revised statistics on the Canadian automobile industry show that the number of motor cars produced during 1926 was 261,727, an increase of 36 per cent.

Hon. Judge Jas. Flynn, former Premier of the Province of Quebec, and puisne judge of the Court of King's Bench, of the Province of Quebec, is dead, after an illness of several weeks.

By September 1 the Independent Biscuit Co., Ltd., will have a factory in operation in Calgary, employing a hundred persons, it is announced. The company is capitalized at \$250,000 and will operate under a federal charter.

D. R. Poole, former secretary of the Manitoba Boys' Work board, has accepted the secretaryship of the National Boys' Work board, which represents the churches and the Y.M.C.A. in co-operative boys' work throughout Canada.

Dr. Abraham Zingher, noted bacteriologist, who helped perfect the Schick test for diphtheria, was asphyxiated when he dozed in his laboratory at New York, while conducting research into the Dick test for scarlet fever.

Canada will be represented at Geneva on the question of naval disarmament by Hon. Ernest Lapointe, minister of justice, and W. A. Ridgell. Mr. Lapointe is returning by way of the Suez route from Australia where he took part in the official opening of the new capital at Canberra.

The Department of Agriculture has removed the embargo on cattle entering Canada from England. The embargo was imposed on account of the foot and mouth disease. It was originally applicable to the whole of Great Britain, and was removed from Scottish cattle only about a month ago.

Origin of "Humbug"

"Humbug" originated when James II of England coined base metal in his fight for the crown. The Irish called it Uin Beg (worthless money), which became first Oumbug and then Humbug.

Diarrhoea Summer Complaint HE ALWAYS USES

Mr. T. F. McGregor, McLennan, Alta., writes: "Over forty years ago my mother used to give us Dr. Fowler's Extract of Wild Strawberry for diarrhea and summer complaint. All through the years since then when troubled with an excessive looseness of the bowels I have been accustomed to take a few doses of the same old, reliable remedy and it always seems to have the desired effect, no matter what the cause."

Don't Accept a Substitute

This valuable preparation has been on the market for the past 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

R. W. BALL

Formerly general superintendent in charge of eastern lines of the Canadian National Telegraphs, has been appointed general superintendent of western lines, with headquarters at Winnipeg. Mr. Ball will have jurisdiction over all territory west of Port Arthur to the Pacific Coast.

Plans for Russian Aviators

Five long flights are being planned for this year by the Society for the Development of Aviation and Chemical Industry in Russia. The first three will be within Russian territory, but a Soviet plane will attempt a flight to Stockholm, Copenhagen, Berlin, Paris, Prague, Vienna and back to Moscow. The fifth flight will be from Moscow to the Far East.

Great Britain is Only Country Not Sharing in Business

Russia has hitherto been given the credit or discredit of being the chief source whence the warring Chinese factions have obtained their supplies of arms and other materials of war.

Russians have been frequently reported to be serving in both the Northern and Southern armies, and the chief adviser of the Cantonese government during its drive to the Yangtze Valley was Michael Borodin, the chief agent in China of the Soviet government, believed to be still in Hankow, the seat of that faction of the Cantonese most deeply imbued with the Communist ideas.

Anxious to get fresh light on the origins of the Chinese arms supply, the contributor to the Nation and New Atheneum, of London, England, who uses the pen-name of Kappa, conducted a private investigation of his own, uncovering a number of interesting facts.

He found that while the Russians had contributed both armaments and men to both sides, some other nations had also been active in a similar way, notably Germany, that country sending to China during 1925 armaments to the value of nearly \$3,500,000. Some surprise would be natural at finding Norway in the traffic to the extent of \$1,250,000, with Italy next, furnishing munitions worth \$1,000,000. United States manufacturers equipped the arsenal of the Cantonese, and France provided military airplanes. Great Britain, indeed, was conspicuous inasmuch as it was the only country that did not share in the business.

European residents in China who were compelled to fly before the advancing Cantonese probably did not realize that the Nationalist troops were armed with Western weapons. The situation, as the Brockville Recorder and Times sees it, recalls its kinship to that existing during the war when the Canadian troops became the target of shells from whose construction nickel mined in Canada entered.

That Great Britain has refrained from assisting the arming of the Chinese redounds greatly to her credit. It is evident enough that uprisings and internal warfare will reign in China as long as traffic in arms is permitted to proceed without interference from the great powers. It can scarcely be satisfactory to the people of the United States to learn that the very arms used at Nanking, where one American, at least, lost his life, may have been supplied by a United States munitions firm. The practical solution of the difficulty apparently lies in reaching an agreement limiting the traffic in arms and signing and ratifying the Arms Trade Convention to that end. — St. Thomas Times-Journal.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Trucked Hogs Grade Well

With the extension of good highways from the marketing centres into the country the number of hogs delivered to the stockyards and packing houses by truck is constantly increasing. Not only is the delivery accomplished quickly, and therefore in good condition, but as was pointed out at a number of swine meetings in Eastern Ontario by Mr. Eric D. McGreer, the sheep and swine promoter of the Live Stock Branch at Kingston, it leads to rapid improvement in the grades because the farmer can see for himself the type of hog for which the highest price is paid. This explains why the percentage of sales in hogs trucked to market is usually higher than where they are shipped by rail.

Tom—"How can that little birthday gift for your wife be a surprise if she told you what she wanted?"

Henry—"I'm not going to give it to her."

How easy it is to tell others that it's no use to worry.

SUNDAY SCHOOL LESSON

JUNE 19

PETER TEACHES GOOD CITIZENSHIP

Golden Text: "Love worketh no ill to his neighbor."—Romans 13:10.
Lesson: 1 Peter 2:11-17; 4:1-5.
Devotional Reading: Psalm 146:5-10.

Explanations and Comments

1. The Second Life, 2:11, 12.—"Beloved, I beseech you as sojourners and pilgrims" thus Peter addresses his readers. Peter is here speaking metaphorically; he wishes them to realize that life is a journey, not a goal, and that the attainment of character which is eternal should be their aim; they were living, as it were, in exile on earth, heaven was their true home.

"The Christian looks for a life eternal. In comparison thereof the best things of this time are of little account. It is but as a lodging for a brief night, and at dawn the traveller sets forward for his true home."

Since they had but a short time to stay on earth, they must live their brief life nobly. "I beseech you to abstain from all fleshly lusts, which war against the soul," are Peter's words.

"Do not let us so narrow its interpretation that the majority of us escape the grip of the apostle's injunction. Let us attribute a comprehensive content to the unwelcome word 'lust.' 'Lust' includes the entire army of unclean forces which are antagonistic to the exalted realm of the spirit. It includes not only the carnal desire, but the jealous eye and the itching pad. Fleshy lust is everything in life which stains the windows of the spirit. Fleshy lust is therefore inclusive of envy, jealousy, avarice, insatiable selfishness, andordinate ambition."—J. H. Jowett.

"Having your behavior seemly among the Gentiles; that, wherein they speak against you as evil-doers, they may by your good works, which they behold, glorify God in the day of visitation." How like an echo from the Sermon on the Mount this seems! "Let your light shine before men; that they may see your good work, and glorify your Father who is in heaven." So Christ's pilgrim leaves a track of light behind him; he is a witness. The phrase "in the day of visitation" suggests a fear in the apostle's heart lest the response to this witness might not be immediate; it might have to abide Christ's own time. The hour of visitation which will also be the hour of illumination will come, and then all the quiet witness will tell—the holy walk, the patient endurance, the lofty testimony, the life that is fair to see."—J. M. E. Ross.

Woman Radio Expert

Has Worked Up Well Paying Business in Brooklyn, N.Y.

Three years ago Miss Harriette F. Quick, of Brooklyn, N.Y., bought a radio set. It intrigued her. She took it apart to see what made it work, and finding that it was not neatly made, she rebuilt it to suit herself. Later Miss Quick showed the rebuilt set to some of her friends and they liked it so well they ordered sets like it. That started her in business and she set up a work bench and started filling orders. Today she does nothing else but build radio sets, except when she is erecting aerials or trouble shooting. She is Brooklyn's only woman radio engineer and one of the few feminine radio experts in the world.

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

Employment at High Point

Returns Show That Employment is Now at Highest Peak Since 1920

Reports up to May 1 of this year from 5,948 firms showed that employment in Canada was at the highest point it has been since the Canadian Government Bureau of Statistics began to keep employment records in 1920.

The payrolls of the 5,948 firms reporting on May 1, showed that there were \$30,859 persons employed. Manufacturing, construction and transportation recorded the most pronounced improvement, but large gains were also noted in trade, services and communication.

The official returns on employment in Canada do not include farmers. In the months of April and May there is always a considerable demand for farm labor to help in the seeding, particularly so in Western Canada, where millions of acres are sown to wheat and other grain crops.

Keep both eyes open on an enemy who wants to do you a favor.

Why Firestone Tires Are Better

One of the outstanding developments by Firestone Engineers is the Gum-Dipping process which impregnates and insulates every fibre of every cord with rubber—adding strength to the cords and reducing internal friction and heat so destructive to tire life.

The Firestone Dealer in your locality will gladly explain to you the extra value of Gum-Dipping. He is prepared to demonstrate how the cords of the carcass are saturated in a rubber which makes motoring more economical with added comfort and safety.

Firestone Builds the Only Gum-Dipped Tires

Complete Restoration of Rheims Cathedral

Historic Building Destroyed by German Fire is Again Open for Service

For thirteen long years the shell of the Cathedral of Rheims remained silent. Thirteen years have elapsed since the last service was held in the building which in the eyes of the whole civilized world, became the symbol of France's sufferings, trials, renaissance and regeneration.

Three dates stand out tragically marked in the cathedral's history. On September 4, 1914, the first German shell crashed through the north transept. On September 6, 1914, Mass was celebrated for the last time beneath the noble arches, under the shadows of which Joan of Arc five centuries ago had the Dauphin crowned King of France. On September 19, 1914, the cathedral was destroyed by the fire and the roof and bells crashed in, more than 400 tons of molten lead streaming down into the blazing furnace.

The long work of restoration is now terminated and the keys of the completed building have been handed over to Cardinal Lucon, Archbishop of Rheims.

Issuing Jubilee Stamps

Postmaster-General Veniot is issuing a special series of postage stamps to commemorate the Diamond Jubilee of Confederation. They will be larger than the normal issue, and will depict the development of the Dominion, the expansion of its transportation systems and various phases of the nation's industries and resources. It is stated the stamps will bring joy not only to philatelists, but to the public generally.

Australian wildernesses abound in subterranean rivers which may be tapped by artesian wells. Queensland now raises 600 million gallons per day. The artesian belt of Australia is larger than all Argentina.

WILL CONTINUE NEGOTIATIONS ON BORDER RULING

Washington.—Ample protection to all Canadians whatever their birthplace who have been in the habit of commuting across the international border to daily employment is asked of the United States in a note from the Canadian Government. The note is in reply to a recent note from the United States on border immigration regulations.

Hon. Vincent Massey, Canadian minister, delivered the note to Frank B. Kellogg, Secretary of State. Comment from the state department will be withheld until officials have considered the Canadian communication more fully.

The note approves the offer of Mr. Kellogg to continue negotiations on border immigration and expressed the hope that a satisfactory settlement will be reached but regrets that the United States Government did not see its way clear to amend the border ruling on April 1, which went into effect June 1 and which gives non-active Canadians six months in which to secure entry as immigrants under the quota law.

It points out that there is no precedent for the application of the term "immigrant" to citizens legally domiciled in another country and retaining their citizenship in that country.

The Jay Treaty of 1794 is quoted to illustrate the broad principle of free border intercourse "to promote a disposition favorable to friendship and good neighborhood," and the note points out that the laws of Canada make no distinction between its citizens on the strength of birth place any more than do the laws of the United States distinguish between native and naturalized citizens.

Socialist Mayor Ignored

No Invitation for Plymouth's Chief Magistrate When Prince Visits Town

London.—The Prince of Wales has arranged to make a tour of Cornwall and Devonshire for several days, and in connection therewith some resentment is felt because those in charge of the Royal Western Yacht Club's proposed dance in Plymouth, Devonshire, have not invited Mayor J. J. Hamlyn Moses, Plymouth's first Socialist chief magistrate, to the dance. The town clerk and other members of the Plymouth council have been invited.

"I am too big to mind, personally," Mayor Moses said, "but it is the town that matters. It is regrettable that any such spirit of snobbishness should be allowed to creep in and injure a function like this."

Arrested on Serious Charge

D'Autremont Brothers Are Taken Into Custody in Ohio

Steubenville, Ohio.—Ray and Roy d'Autremont, wanted in Oregon for the killing of a postal clerk and three trainmen in a passenger train held up four years ago, were arrested by federal agents and local police.

The twin brothers, for whom a world-wide search has been conducted, were working in a steel mill here. Both admitted their identity when confronted by officers.

The brothers are accused of dynamiting a passenger train in a mail hold-up at Siskiyou, Oregon, in 1923.

New Pacific Cable

Victoria.—The freighter Drechtdyk has commenced to unload 70 miles of cable which will form the last link in the new cable that connects up Canada with Australia and New Zealand. The line when completed will double the capacity of the cable business between the units of the British Empire.

A Long Auto Trip

Los Angeles, Calif.—A 6,700 mile trip in an automobile from the Pacific coast to New York city and back in seven days was completed here by Louis D. Miller, San Francisco business man, who claimed a new record for continuous motor travel and for elapsed time in the trans-continent tour.

Bay Ports Inquiry

Some Misapprehension Felt in West Over Investigation

Ottawa.—Carrying out the Hudson's Bay Railway project is being accomplished with some difficulty although it will be done. There is no doubt about that.

For years in the East, the scheme has been opposed, one leading paper referring to it persistently as a "fantastic mirage." Parliament, until this session, was either antagonistic or apathetic but Hon. C. A. Dunning then succeeded in getting through, with comparative ease, the appropriation that commits the Government to the completion of the line.

Now, when matters have been pretty well squared away in the East, criticism comes from parts of the West because the merits of Churchill as well as Nelson are to be looked into.

As has been pointed out, the decision to investigate Churchill does not portend its selection as the terminal. As a matter of fact, it is learned that the proposal of inquiring into Churchill came from the British expert, Frederick Palmer. He urged that to be complete his report should cover both places and that in any event his remuneration would be the same. That, really, is all there is to it. Heretofore Nelson alone has been considered. Now, Churchill also will be looked over and detailed data secured as to both locations. The wider inquiry, however, does not indicate the choice of Churchill but at the same time it will not exclude it as a possibility if it be found that its advantages exceed those of Port Nelson.

Plan Confederation Memorial

Victoria Club Members Will Launch Campaign Shortly

Victoria, B.C.—Erection of a temporary memorial to commemorate the achievements of the fathers of confederation will be the contribution of the Victoria Kinsmen's Club to the diamond jubilee of confederation celebration here next month. The Victoria club will shortly launch a campaign to have erected in the capital city in each Canadian province a permanent memorial to the Fathers of Confederation to be built by the provincial governments with the assistance of the Federal Government.

Want Funds for Relief Work

Vancouver.—Relief of cases of distress among war veterans and their families is the purpose to which the organized ex-service men of British Columbia wish the \$250,000 canteen fund allotment for this province to be port which a conference here of representatives of the Canadian Legion, the Army and Navy Veteran's Association adopted.

Bisley Team Has Sailed

Montreal.—The Canadian Bisley team sailed on the S.S. Ausonia from Montreal on June 10. The team will be in command of Brig. General J. Duff Stuart, of Vancouver, with Major Thomas McManus, Belleville, Ont., as adjutant. In addition to the regular team there will be present a team of cadets from the Hamilton Collegiate Institute, who are also going to Bisley to take part in the prize meet.

Want Peace Treaty

Washington.—An informal inquiry as to the willingness of the Washington Government to begin negotiations for a treaty of perpetual peace between France and the United States has been placed before the state department by Foreign Minister Briand. The inquiry is in the hands of Secretary Kellogg, who is expected to answer it within a week.

May Have Crossed Ocean

Montreal.—A carrier pigeon with a ring attached to its leg with the inscription "Lille, France," was captured by J. B. Martin, a farmer of St. Constant, about 25 miles from Montreal. The bird was practically exhausted when caught and is now being taken care of by the farmer until it is claimed, if ever, by its owner.

Sending Delegation to Germany

London.—The British Legion of the Empire Service League has decided to send a delegation to the International conference of ex-service men at Luxembourg in July. German ex-service men will also attend.

ASSASSINATION OF SOVIET ENVOY TO BE PROBED

Premier Brownlee Going to England

Will Inquire Into Establishment of Agency in London

Edmonton, Alta.—Premier Brownlee expects to leave on a trip to England towards the end of this month. He has been considering the possibility of such a trip for some time past. It will be only in part a holiday event, however, for he has a full program of things that he proposes doing over there for and in behalf of the Province of Alberta.

A first hand check up on the immigration work now being carried on by Hon. Herbert Greenfield and an inquiry into the possibilities of a general agency office in London will be one of the main purposes of the trip. The Premier will discuss the situation with various interested parties and organizations, and will see for himself what is the feeling in England

towards closer relations with Alberta. In view of the improved position of the province he will also sound out the attitude of British industry and capital in the same direction, particularly in the hope of interesting further investment in the western Canadian field.

Another item on the premier's program will be an inquiry into the question of marketing Alberta products in England. In this respect he will be working in line with the Saskatchewan Government, which has already sent a commission to the motherland to investigate the conditions and prospects of the livestock and bacon trade, while Manitoba also is considering a similar step. So far as Alberta is concerned the inquiry in addition will bear largely on wheat marketing, about which Mr. Brownlee will ask a lot of questions during the trip. The Premier is now making arrangements to get away and hopes to sail some time in the last week of June.

Appointed By Lincoln

Aged Resident of St. Cloud, Minn., Was Real Pioneer

St. Cloud, Minn.—Charles A. Gilman, 94 years old, former Lieutenant-governor of Minnesota, and one of the few pioneers of the northwest, who received appointment to public office from Abraham Lincoln, died here recently from old age. Mr. Gilman, who had resided here for 72 years, was appointed receiver of the United States land office in 1861 by President Lincoln, and was re-appointed in 1866 by President Andrew Johnson. He served as Lieutenant-governor from 1881 to 1885. Four daughters and a son survive.

Will Be Settled at Geneva

Belgrade.—It has been announced that Jugoslavia is willing to thresh out the Albanian difficulty through the League of Nations and there is nothing to indicate undue excitement or a basis for rumors spread abroad of martial law in Belgrade.

Thousand Square Miles of Blossoms

Nova Scotia's festival time is fast approaching, when a thousand square miles of one of the world-famous apple growing valleys will be smothered in bloom. One of the significant days in this province is "Bloom Sunday," when people go by thousands to the Annapolis Valley to look upon the white and pink tabernacles of fragrant blossoms. The journey over the Dominion and Atlantic Railway at this time of year affords a trip long to be remembered, as the line passes through the very heart of the apple country. They cover more than 1,000 square miles of the province.

Two million barrels of apples were produced in Nova Scotia last year and some idea of the even greater future for this industry can be gathered from the fact that only about one-third of the land suitable for orchards is under cultivation at the present time. It is the nearest apple valley to the foreign markets and this industry constitutes one of the leading sources of wealth for the Province of Nova Scotia.

NAME DELEGATES FOR BRITAIN TO NAVAL PARLEY

Washington.—Names of delegates who will represent Great Britain and her Dominions at the Geneva three-power naval limitations conference have been submitted to the state department by the British embassy and the Canadian and Irish legations. Viscount Cecil, who for years has represented Great Britain in disarmament conferences in Europe, will head the delegation, assisted by W. C. Bridgeman, First Lord of the Admiralty, who will also represent India, and Vice-Admiral Sir S. L. Field, deputy chief of the naval staff.

Canada will be represented by Hon. Ernest Lapointe, the Minister of Justice. In the event that he fails to arrive in Geneva by June 20, the opening date of the conference, Canada will be represented by her permanent agent there, Dr. W. W. Ridell.

J. S. Smith, high commissioner for the Union of South Africa in London, and C. Pienaar, trade commissioner for Europe will speak for the Union, while Sir J. Cook, High Commissioner in London, will represent Australia.

New Zealand will be represented by J. Parr, London High Commissioner, and Earl Jellicoe, Admiral of the Fleet. For the Irish Free State, Desmond Fitzgerald, Minister for External Affairs, and John Costello, Attorney-General, will be present.

Abandons Quest in Arctic

Wilkins Believes Further Flights This Summer Would Be Foolhardy

Fairbanks, Alaska.—For this year at least Captain George H. Wilkins has abandoned his attempt to visit the unchartered Arctic the mystery of its "blind spot." With the coming of the fog which hangs low over the Arctic Ocean in the summer, Captain Wilkins believes that further flights North of Alaska this summer would be foolhardy. Returning to Fairbanks from Point Barrow, the Northern base of the expedition, the Australian explorer and the other members of his party left for the United States.

The explorer has made three flights North of Alaska in an effort to prove or disprove the theory that there are islands between Point Barrow and the North Pole.

The second air voyage into the Arctic was made two months ago and nearly ended in disaster when the plane was forced down with engine trouble on the ice pack.

Wilkins and Ben Wilson, Alaskan pilot, walked 80 miles over the ice to land.

Starting from Point Barrow, Wilkins and Alger Graham, Detroit pilot, essayed the third flight June 4. They flew 200 miles toward Greenland but were forced by dense fogs to return.

New Mining Company for B.C.

Victoria.—With \$10,000,000 cash, C. Julian, noted California oil operator, formally entered into the British Columbia business and development field on a large scale. The formal part was completed at the Parliament buildings when Julian was granted incorporation papers under B.C. laws to operate in this province under the name of the New Monte Cristo Mining Co., with a capital of \$10,000,000.

Spent Weeks in Peruvian Wilds

Toronto.—After weeks of terror in the Peruvian wilderness, Robert Hirsh, electrical engineer who was first reported missing and then dead in the wilds of interior South America, has returned safely to his home town, Toronto. Circumstances compelled him to live two weeks with a tribe of Inca Indians in the jungle, a delay which occasioned alarm as to his safety.

Amundsen Sails for Orient

Vancouver.—Captain Roald Amundsen, world renowned explorer and the only man in the world to have reached the two poles, is a passenger on the Empress of Asia, leaving on her 70th voyage west to the Orient. Captain Amundsen, who flew over the North Pole and also reached the Pole on his famous expedition, is booked for Yokohama.

The Magnitude and Variety Of Work Being Carried On To Assist Scientific Farming

The personnel of the Central Experimental Farms at Ottawa includes fourteen experts, and the list of their various fields of work includes Chemistry, Field Husbandry, Animal Husbandry, Horticulture, Cereals Botany, Agricultural Bacteriology, Apiculture, Agrostology, Poultry Husbandry, Tobacco Growing, Economic Fibre Production, Illustration work, and lastly, Extension and Publicity. There are branch farms and stations in each province and also in Yukon Territory and in the North West Territories. Be it noted that, in Prince Edward Island, there is an Experimental Fox Ranch.

Some three or four years ago Dr. J. H. Grisdale, of the Department of Agriculture, read a paper before the Conference in Scientific and Industrial Research, which was a sort of summary of the activities of his department. Speaking of Field Husbandry, he pointed out that they are carrying on experiments in rotations for the purpose of discovering the most satisfactory sequence of crops. On their farms they had between fifty and sixty different crop rotations under experiment; on the same farms they were conducting cultural experiments with a view to determining the best methods of cultivating the soil combined with the most economical production. Merely as an example of what this means, he quoted the fact that at one farm they had about twenty acres laid off into plots of one-tenth of an acre each.

Fertility experiments are also carried on, the object being to learn on a field scale what applications of manure or fertilizers give the most profitable results. Then there are ensilage experiments to find out what crops can be most successfully used for ensilage in various parts of Canada. The matter of drainage offers one of the most difficult problems connected with agriculture, and investigations are being carried on from one end of the Dominion to the other. The irrigable areas are comparatively limited, but they are all of very great importance indeed, including, as they do, some of the most fertile districts of the country.

There are also land clearing experiments, especially desirable since the opening of the transcontinental line from Quebec to Winnipeg has added a vast area to our available agricultural land.

A few of the activities engaged in by the cereal division are as follows: Production of superior varieties of cereals, wheat, oats, barley, etc.; test of all varieties of cereals; isolation of superior varieties by selection; milling and baking tests; cooking tests of peas, beans, and cereals; studies in yeasts and fermentation; inventing and adapting new machinery for any work connected with the division.

Under the heading of Health, the Health of Animals Branch and the Experimental Farms Branch are co-operating with a view to studying the best methods of eradicating tuberculosis and preventing or controlling contagious abortion, etc. Under Housing, a study is being made of matters affecting ventilation, economy of handling, the general comfort of the animals and of the men looking after them. Under Botany is included forest pathology (e.g. investigating the blight rust of white pine); investigations into rust of cereals and smut diseases of grain. But a mere glance at the shelves of the Library of the Department of Agriculture will give some idea of the magnitude and variety of work being carried on in connection with scientific farming.

Easily Explained

Claims are being made that a new one is the very shortest funny story on record. It was told by Sir Harry Lauder.

"We Scots," he said, "are very fond of telling stories against ourselves, and I expect you sometimes wonder why we have such a great sense of humor."

"Well, I'll tell ye. It's a gift!"

Eminent Pianist: Of course I take my own piano with me wherever I go.

Philistine Hawk: Makes you wish you'd learned to play the flute, what?

Winter Egg Production

865 Eggs Per Month From 52 White Leghorn Pullets

The contention that egg production is not possible during the winter months has been time and again disproven. The following achievements of a poultryman in Northern Alberta will further disprove the statements. During the winter season of 1925-26, a flock of 52 White Leghorn pullets were kept in a house 12 feet wide by 11 feet long. The pullets commenced laying on October 1, when they were five months old. In the five months from November to March inclusive, they produced a total of 4,328 eggs or an average of 865.6 eggs per month. This makes an average production of 55 per cent. The following winter the same owner maintained a flock of 72 White Leghorn pullets which were five months old on October 14. During the months of November to March inclusive they produced a total of 5,200 eggs, an average of 1,040 per month or a production of 65.5 per cent. The reason for the lessened percentage production can directly be attributed to the pullets being hatched two weeks later than those in the flock the previous year.

Winnipeg Newspaper Union

A Frock of Smart Simplicity

Unusually smart is the attractive one-piece daytime frock pictured here, having set-in plaited side panels, short kimono or long sleeves gathered to wristbands, and a shaped collar finishing the V-neck while a belt fastens in the front with a bow or buckle. No. 1603 is for misses and small women and is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3 yards 39-inch, or 2½ yards 54-inch material. Price 20 cents the pattern.

Every woman's desire is to achieve that smart different appearance which draws favorable comments from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centres and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

A Regular Thing

"Is your sister in?" asked the young man.

"No," replied the small brother, promptly. "She's just gone out."

"Ah!" the love-stricken one sighed.

"So I am like the man who went to the cage when the bird had flown."

"Oh, no, you aren't," replied the unfeeling boy. "You're like the month of June. Because every time you come in May goes out."

Solving Rust Problem

Important Discovery Has Been Made, It is Reported

A discovery "of great scientific importance" in connection with wheat rust has been made in the Dominion rust laboratory, according to an announcement made here by Dr. H. H. Tory, chairman of the National Research Council. No indication is given as to the nature of the discovery but "an early announcement may be expected," according to Dr. Tory.

The laboratories of the department of agriculture in Winnipeg and of the three prairie universities are cooperating closely in the investigation, it is stated. This much information has been given out as a result of the meeting of the National Research Council.

The council's committee on grain research is to undertake a study of the effect of moisture and various methods of drying upon the value of wheat for milling purposes. At several places in the West fields are being prepared for this investigation and portions of the crop will be left in the fields for extended periods to determine the exact results of different weather conditions. An effort is to be made to solve this problem in the shortest possible time.

Secures Additional Moisture

Importance of Shelter Belts on Prairie Farms Cannot be Estimated

The planting of shelter-belts around farms on the Canadian prairies has given appreciable results from the agricultural standpoint. The water-conserving power of the soil has been increased; better crops have resulted; and the protection from extremes of temperature and wind movement has enabled the introduction of the harder fruits in many localities. Of the particular importance is the additional moisture secured through the formation of snowdrifts which melt gradually in the spring, providing water after adjoining open areas have largely dried up.

Fish Canning Plant

Establishment of a fish canning plant on Lake Winnipeg this summer is assured, and final arrangements as to location alone remain to be settled before construction is begun, according to J. M. Davidson, secretary of the Industrial Development Board. J. D. Fisher is the promoter of the scheme. He proposes building two plants, one near the Berens River for summer operation and packing, and one further south for the winter season. The company will can whitefish, pickerel, tullibee and trout.

The nightingale is no more interesting than the midnight cat to the man who wants to sleep.

Radio Plays Important Part In Maintaining Communication With Canada and Old Country

On Breeding and Feeding the Hog

Advisable Methods to Follow on the Farm

"Reading maketh a full man" quoth Lord Bacon. Another learned authority has said that "experience is the best teacher." Both sayings possess the merit of truth but combined they come as near the perfection of the acquisition of knowledge as is possible. In modern times the combination comes well within the possibilities. Take agriculture, for instance, not a week passes in Canada that a publication is not placed in circulation dealing with some branch, furnishing valuable information founded entirely on experience and studious research. One such is the Dominion Animal Husbandmen's pamphlet treating on the "Breeding and Feeding the Market Hog," in which Mr. G. B. Rothwell tells of advisable methods to follow on the farm. He tells how young stock should be selected, how a good strain can be developed, what course to pursue in mating the breeding sow, in breeding two litters a year, in regulating supply, in housing, in feeding boars, sows and little pigs, and advises of feeds that may be home produced and those that must be purchased. He also gives important counsel on necessary mineral supplements, remarking in doing so that "No domestic animal so quickly shows the results of mineral deficiency as does the pig."

Canadian Grown Tobacco

Growers From Kentucky Are Moving to Ontario

"The American tobacco grower realizes that he must seek a new field where growing and marketing conditions are better," states Robert J. Spence, chief field man for the Ross Tobacco Co., of St. Thomas. "They naturally look to Canada where the industry is in its infancy, where the soil has not been depleted, and where the British preferential tariff makes growing profitable. The migration from Kentucky and the tobacco growing states has only begun."

Brown—"Yes, I'm saving up to buy a car."

Stain—"When are you going to get it?"

Brown—"Get it? We've had it for eighteen months now."

No man can hope to be happily married unless he is a good listener.

Anglers' Harvest Assured

Banff Fish Hatchery

The 1930 harvest for anglers in the Canadian Rockies is just hatching out at the Banff Hatchery. The tiny youngsters, who are making their initial appearance, are breaking forth from eight hundred thousand brown trout eggs which were shipped to Banff by Canadian Pacific Express from Wisconsin last February.

The eggs, which had developed to the "eye-stage" before being shipped, were packed in shallow cheesecloth trays, insulated by damp moss, with a supply of ice to provide continued moisture. Several weeks after they had been received at the hatchery the young trout broke their shells and began another period of their growth. During this time they obtained their supply of food from a sack attached to their undersides, and when this had

been used up, the little fish were ready to be placed in the waters which they were to restock.

The streams in which these young trout will be placed have been planted three times previously, the first planting being done in 1924. The former planting were Loch Leven trout and the results were more than satisfactory. It is expected that the marvellous growth of the 1924 planting will be exceeded by the one now hatching, for the crossing of the two species has developed a trout larger than the Loch Leven.

Canada's first use of radio was the establishment of radiotelegraph communication between stations at Belle Isle and Chateau Bay on the mainland on the north side of the Belle Isle Straits, as a substitute for a submarine cable which was continually being interrupted by icebergs.

The stations were built by the Marconi Company. Power for the transmitter was obtained from dry batteries, and the receiving sets were of the most primitive type, using Marconi's coherer of metal filings in a glass tube as the detector.

Since 1901, when 50 miles was a long range for a station, progress in radio has been steady. In 1902, Sir Wilfrid Laurier invited Mr. Marconi to Ottawa, and as a result a transatlantic radiotelegraph service between Canada and Great Britain was established. This service was inaugurated in 1907, and has been maintained ever since that date.

The apparatus of the Glace Bay transatlantic station was, of course, materially altered and improved from time to time, and last year this station was discontinued and the service transferred to a Beam Station, the latest development in radio, located at Drummondville, P.Q.

At the time of Confederation, a trip across the Atlantic was still an adventure, taking from two to three weeks. Today the liners run with a regularity approaching that of a railroad service, and a passenger, six days before the ship is due to arrive at Montreal, by means of long distance radio, is able to reserve a room with bath for a certain hour on a certain day, as a matter of routine. As the ship approaches within 500 miles of the Canadian coast, she comes within the range of the chain of "aid to navigation" radio stations; if she is in a fog she verifies her position by means of the Direction Finders; if she desires to check her chronometer, she does so by means of the radio time signals. Every twelve hours the navigator is provided with complete weather forecasts for the area in which the ship is steaming; and he is advised of the exact location of any ice which may be in his track.

The Great Lakes and East Coast "ship to shore" radio system consists of an intercommunicating chain of 26 stations and 6 beacons, extending from Port Arthur at the head of the Great Lakes to the Atlantic, and on the Pacific Coast a chain of 11 stations extending from Victoria to Alaska.

The Dominion, a country of vast areas and sparse population, lends itself to the fullest utilization of broadcasting, and there are today some 400,000 receiving sets in operation.

Canada has today some 81 broadcasting stations, practically all of which are operated by private or commercial interests for indirect advertising or publicity in one form or other. The Province of Manitoba has established a provincial service, and it is understood that other provinces are considering the adoption of a similar policy. The Federal Administration is fully appreciative of the utility of broadcasting to this Dominion and will see that it develops along the lines which will give the best possible result to our listening public.

The Ungallant Conductor

One of these women who try to appear so young that they are even ashamed of having their children get big and give them away got on the street car with a little girl and gave the conductor full fare for herself and half fare for the child.

"Excuse me, madam," said the conductor, "but your daughter seems to be more than twelve years old."

The woman put on a coy expression and exclaimed: "Why, conductor, you would never take me to be the mother of a girl that age, would you?"

The conductor drew back and looked at them both over carefully and then said, "Lady don't tell me that you are her grandmother!"

Doc: You're pretty badly beaten; you ought to keep out of such bad company.

Victim: I'd like to, but she won't let me get a divorce.

PAINTED FIRES

BY NELLIE L. MCCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER I.—Continued

"Are they all bad, Aunt Lilli?" asked Helmi tearfully.

A long spell of coughing delayed the answer.

"They don't want to settle down in their home like we do; they don't like kids and a nice quiet life—though they will tell you they do. You are pretty Helmi; that's why I am afraid. I don't want Mike to see you if it can be helped. He'll want you just like he wanted me. Kate, the cook, will keep you safe. All the girls are my friends. . . . Remember what Aunt Lilli said, Helmi."

Having received the extension of time she had asked for, and having delivered her message, Aunt Lilli gave up the fight without a struggle. The silence of the room was broken by the stormy sobs of big Kate, the cook, and the two upstairs' girls. She had said goodbye to all the girls in the house the night before. Her last and tenderest words were for her young niece.

"If you could only talk English I would stay," she had said. "It is a good country, but it's too hard for a pretty girl who has no English."

"I can learn, dear Auntie," said Helmi, kissing the thin white hand, "like you did, Aunt Lilli," but Aunt Lilli did not hear.

Like Laine, the proprietor of the "Farmer's Home," learned in some way of his niece's arrival and asked to see her. He pinched her arm affectionately the day of the funeral and told her to call him "Mike" and cut the "Uncle" stuff. His burning eyes made her shudder.

One of the girls talked Finnish, and in big Kate's room off the kitchen, a council was held. Helmi was firm in her determination to stay. Big Kate, who had one hundred dollars in trust for her, urged her to go home; the Finnish girl faithfully interpreting both sides of the argument.

For three days the discussion raged, Helmi during the intervals having washed her clothes and learned their English names. She also did her share of dishwashing and potato peeling. Her skill in these matters won the heart of the cook, who on the

OPERATION LEFT HER VERY WEAK

Letter Tells of Wonderful Relief After Taking Lydia E. Pinkham's Vegetable Compound

Coniston, Ontario.—"After a severe operation and a three weeks' stay in a hospital I returned home so weak that I was unable to move a chair. For four months I was almost frantic with pains and suffering until I thought sure there could not be any help for me. I had very severe pain in my left side and suffered agony every month. One day when I was not able to get up my mother begged me to try your medicine. My husband got me a bottle of Vegetable Compound at once and I took it. I started a second bottle, and to my surprise and joy the pains in my side left me completely and I am able to do all my work without help. I am a farmer's wife, so you see I can't be idle long. In all, I have taken six bottles of Lydia E. Pinkham's Vegetable Compound, five boxes of the Compound Tablets, two bottles of Lydia E. Pinkham's Blood Medicine, and have also used the Sanative Wash."—Mrs. L. LAJEUNESSE, Box 103, Coniston, Ontario.

W. N. U. 1685

As Miss Kenny read the letter, following each line with a red forefinger, consternation settled upon her like a tent.

"What the devil!" she began. "Finn girl, red-haired and smart . . . had to get her away, it was not safe for her here . . . I remain your loving sister, Kate."

"Oh! So she remains my lovin' sister! Well, I am no lovin' sister of hers. She always finds the trouble,—she can place it without a willow wand, can Katy,—and then hands it on to me. Well, here's a pretty how-do you do, a Finn girl, no English, comin' on the train. 'Please Maggie, find her a place. Easiest thing in the world, Maggie gorr a thing you have to do; anyway'"

"See here, Anna Milander, you should be the one to look out for a Finn girl. Listen to this."

The head dining room girl came languidly into the kitchen. "What's the row?"—she asked.

Maggie read the letter.

"She'll come in at five tomorrow, just when I'm up to my eyes in the dinner. Now, you go down—you can speak to her and be back in time to carry the dinner, too."

Anna's head was flung back. "I think I see myself—I didn't send for this girl—she's nothing to me—merely another wage slave coming to take a job. There's too many girls now for the jobs."

Maggie Kenny's face was screwed up in astonishment. "My God," she cried, "is that the brotherhood you learn at your meetin's?"

"We're opposed to immigration," said Anna firmly, "the Government dumps in people here, just to keep wages down. It's the capitalists again. You haven't sense enough to see it."

"For all the brazen, selfish lumps I ever saw it's you Anna. When you came here two years ago all you could say was 'Yiss.' Who showed you how to make a bed and comb your hair and garter up your stockings? And now, by Gosh! you wouldn't meet another girl at the station, and her from your own country and all. Did you never hear of the Golden Rule, do as you would be done by?"

"Old stuff, Maggie," scoffed Anna, "no one believes that now. The idle rich sling that stuff around to lull us to sleep, that's all. It may catch you and your bread, but not us. We've gone a long way past that."

"What the devil do you want, Anna Milander? Haven't you a good job, good meals, good bed, better clothes than you ever had? What alls you?"

"We have nothing to lose but our chains," said Anna loftily. "How long could old Spencer run this joint without us? The world belongs to the workers, but we haven't the backbone to claim it. Softies like you keep us back with your Golden Rule, and the Spencers get the profits. There's only two classes, those who work and those who live on other's work. Some people earn and some spend. If the workers would all organize we could dictate terms. Some day we'll do it. Then a new day will come."

(To Be Continued.)

Iodine for Scarlet Fever

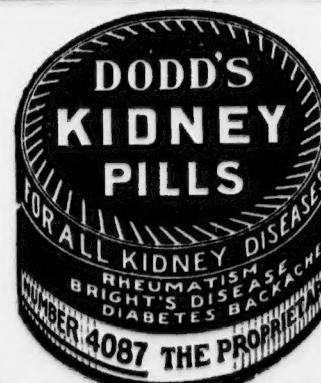

Iodine, injected hypodermically, not only will cure scarlet fever, but will totally kill its germs, according to a doctor practising in the Ambruzzi Mountains in Italy. He said he tried it during a recent epidemic and stamped out the scourge in a few days. The iodine was injected in quantities proportionate with the age of the patient.

"Grandpa's a hundred and three year's old today, doctor."

"Isn't that splendid! And does he read or do anything?"

"No, he don't seem to have no ambition for nuttin'."—Pearson's Weekly.

Two of life's urgent requisites are good health and a little more money.

Invented Good-Paying Job

Englishman Tramps Around Country Typing Letters for Farmers

On tramp with a typewriter, doing letters for people on lonely farms and in out-of-the-way villages, is a job that an ex-service man has invented for himself in order to earn a living.

He is Horace Woodford, a native of Otley, England, who was a clerk at Hull before joining the army, and afterwards was in turn, hop-picker, ship's stoker and fish hawk.

"I have been making a decent living for the past two years tramping round the country from the early spring to the late autumn," he told an interviewer recently.

"I type letters for farmers and their servants, and when I strike any big public works I always find that the men—more especially the navvies—are glad to have the opportunity of having a letter typed for them.

"I have tramped all over England, Ireland and Wales, and now I am going to try Scotland. My charge for letters, long or short, is 12 cents. I must have typed thousands, including love letters.

"I never knew there was so much romance on the land. To hear some stolid looking farmer folk telling their love story in the rough and ready language, was a surprise to me.

"The girls always want a line or two of poetry, and as I have an odd book of verse I am able to oblige them."

An Unusual Bequest

Toronto Man Left Something Better Than Money to Children

A Toronto real estate dealer, who died recently, didn't leave his family very much money, but he bequeathed to his children some advice which, if acted upon, will prove to be much more valuable than gold or silver. In his last will and testament he declared that his fervent prayer was that all his darling children will embrace every opportunity to do good, to be kind and loving to all the human family."

If the beneficiaries of this advice ponder over it, and put it into daily practice, they will lay up for themselves riches, both in this life and in the life to come. They will be rich in the affection and regard of their fellowship. Like begets like. If men manifest kindness and love toward the human family, they will receive the same in return.

Money is not everything. As Tennyson has so well put it, "Kind hearts are more than coronets." So fathers who have little or no money to leave to their children may easily do a lot worse than this Toronto father who sought to bequeath to his offspring the spirit of kindness and of brotherly love.

Little Helps For This Week

Blessed are the pure in heart, for they shall see God.—Matthew v. 8.

The pure in heart God's face shall see!

And does not this

Include the whole ecstatic scale?

Of promised bliss?

Can souls which His dear presence gain,

More joy attain?

Certainly as the open eye drinks in the light, do the pure in heart see God. And he that lives truly, feels Him as a presence not to be put by.

—Theodore Parker.

The pure in heart see God in every thing, and see Him everywhere; and they are supremely blessed.

—John G. Holland.

Back-to-the-Land

A member of Parliament was a passenger on a steamship which was slowly sinking. The passengers were climbing into the lifeboats.

"Sir," suggested a reporter on board the ill-fated vessel, "there's a chance for some publicity. If you cared—"

"You may quote me as saying," replied the statesman, "that I am heartily in favor of a back-to-the-land movement."

Barnes—"I make my son practice four hours each day."

Rod—"Heaven, man, you'll make him hate music so much that he will give it up."

Barnes—"Fine. That's just what I want."

We Couldn't Do Without It

Say The Movie Stars

So say all whose work is hard after they try the delicious, invigorating refreshment of Wrigley's Double Mint.

Growth of Winnipeg

Is Now the Third Largest City in Canada

Winnipeg is still the third largest city in Canada, according to figures furnished by the Board of Trade. Its population, including suburbs, is 291,616, as given in Henderson's Directory. Montreal and Toronto are, of course, well ahead of this figure, the former at a million and the latter at three-quarters. City Hall records give the population of Winnipeg proper at 198,932, or a gain of 7,000 over a year ago. Vancouver comes next with about 160,000.

THAT BABY OF YOURS

Keep Him Well With the Aid of Baby's Own Tablets

No matter how strong and rosy your child may be it requires a laxative sometimes so that the stomach may be kept sweet and the system clean.

Formerly the laxative medicines given to children were disagreeable ones—castor oil, senna tea, powders and so on. But now Baby's Own Tablets, easily administered and pleasant to take, have superseded these. The children like Baby's Own Tablets.

Not only as a laxative but in many other ways these Tablets are an ideal remedy for little ones. They quickly reduce feverishness, relieve indigestion, colic and vomiting, prevent constipation, check diarrhoea, allay teething pains and promote healthy, natural sleep.

You can get Baby's Own Tablets at any dealer in medicine or at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

One thing about the greedy man, and he who begs along the street, the former always eats too long, the latter always longs to eat.

Sores Heal Quickly Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Electric Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healer among oils and numbers of people can verify that it healed where properly applied.

Dad—"I promised you a bicycle if you passed the examination, but you failed. What have you been doing?"

Son—"Learning to ride a bicycle."

Ease sunburn with Minard's Liniment

A man doesn't fully realize the blindness of justice until he gets the short end of a lawsuit.

It keeps in the Opened Tin

Never worry about leaving Eagle Brand in the opened tin. It keeps perfectly, pure and sweet, if kept covered in a cool place.

Borden's EAGLE BRAND CONDENSED MILK

Minard's Liniment is reliable.

**Built for
Endurance**

BEHIND the beauty of Chevrolet there is an abundance of strength and stamina, just as there is a great store of surplus power. The rugged channel steel frame, the husky banjo-type rear axle, the powerful valve-in-head engine and every detail of construction combine to defy the ravages of wear and tear, of hills and ruts, of mud and sand, of extremes of climate and of hard, continuous driving.

As Chevrolet has been designed for beauty, powered for performance, planned for economy—so Chevrolet has been BUILT FOR ENDURANCE.

And this—the most Beautiful, the most Powerful and the most Rugged Chevrolet is

Chevrolet History—is selling at new, low prices, the lowest for which Chevrolet has ever been sold in Canada.
